

Committed to sustainability and making sure our practices lead to a better environment for you.

EXTERIOR ENVELOPE MATERIALS

- DRYline exterior sheathing - manufactured from 98% recycled fibrous material
- LP SmartSide exterior trim reduces waste and is made in accordance with the Sustainable Forestry Initiative
- James Hardie panels and siding are considered green and sustainable

INDOOR AIR QUALITY

- Owens Corning, Johns Manville, and Knauf Insulation "GREENGUARD" certified products - certified for indoor air quality
- Bryant heating and cooling units - heating units have a 96% efficiency, electric units have 8.3 HSPF, air cleaners and purifiers, and whole home humidifiers, and electric water heaters are 95% efficient

DELTA WATERSENSE FAUCETS

- Bath, Kitchen and Shower areas can have faucets 30% more efficient than standard faucets at 60psi

LED LIGHTING

- Fischer Homes uses Energy Star LED surface mounted lights in all of its new homes
- These bright, energy-efficient lights have an expected lifespan of 40,000 hours

SHAW FLOORING

- Cradle to Cradle recyclable Anso carpet means it can be made into carpet again and again
- 85% of Shaw manufactured products are Cradle to Cradle Certified

LOCAL SOURCES

- Fischer Homes uses local sources to supply as much as possible to keep emissions low, transportation costs down and for a higher level of quality

WINDOWS

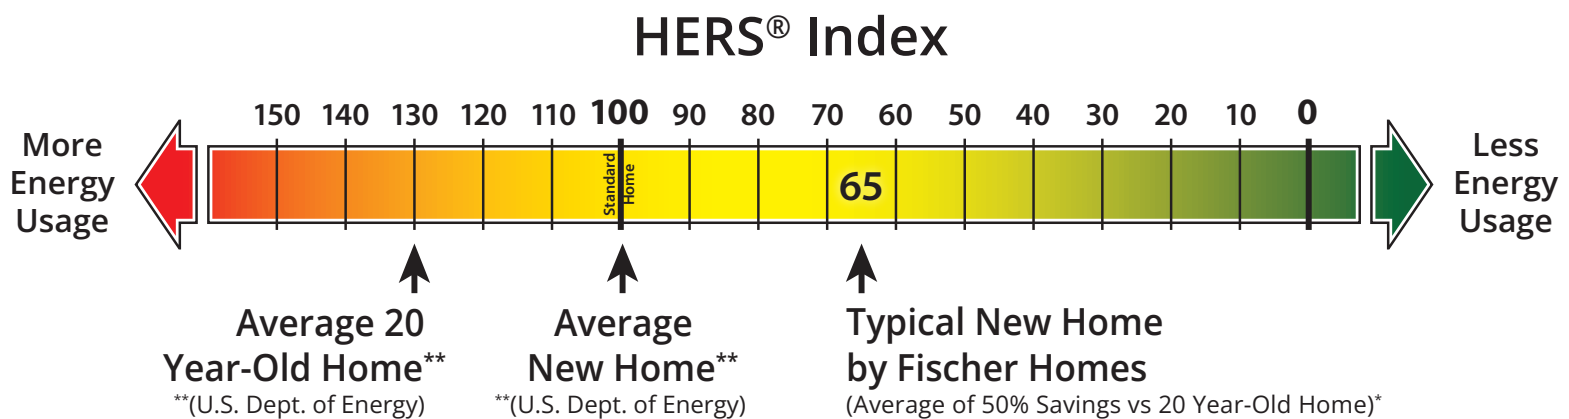

- Keeps cool air in the summer and warm air in during the winter
- Windows block 84% of UV rays, low E windows

PAPER REDUCTION

- Fischer Homes is committed to reduce its reliance on paper - which makes up 1/3 of all landfill waste
- Scheduling, plans, specifications, scope and standards, homeowner materials are all digitally available

What Would You Do with a 50% Savings on Energy Costs?

energywise with FISCHER HOMES

For More Information Visit fischerhomes.com/energywise

Fischer Homes is committed to sustainability and ensuring our practices lead to a better environment for our homeowners. We strive to use locally sourced products in every home that we build. We also use energy-efficient materials and designs to save our homeowners up to 50% on energy costs versus homes built 20 years ago. Ask us about our materials and methods that are better for the environment and easier on your wallet!

All Fischer Homes' single-family detached homes are a part of the Fischer Homes Energywise program. This means your new home has been designed and built to standards well above other homes in the market today. The Energywise program gives you the peace of mind that your home has undergone better inspections and testing provided by a third-party energy rater. We are taking extra precautions to ensure the insulation of your home is up to high-quality standards prior to being drywalled. We also perform a duct blaster test to greatly reduce air leakage in your ductwork. We also perform a blower door test to reduce the air infiltration in the exterior walls and ceiling. This means a better built home, with better quality, and better comfort while conserving energy and making your home a better investment for today and tomorrow!
